

## Knorpelwerke

*German Abstract Film Panorama*

Punto y Raya Festival 2016 was closed with a special selection of abstract films produced in one of the main countries Absolute Cinema originated back in the early 1920s. The programme offers a fascinating journey through German abstract cinema of the last 18 years fluctuating between fine art, pure cinematic experiments, music videos and material originally intended for video installations as well as live performances. Their audio-visual unfolding in the black box of ZKM's cinema allows a focused exploration of the non-representational diversity in today's hybrid world.
